C • C++ • Java • OOP • Data Structures • Algorithms • Java Swing • mysql • Oracle • HTML • CSS
• JavaScript • Bootstrap • Node JS • Express JS • MongoDB • Git • GitHub • Kotlin • Android Basics • Kotlin
• Problem Solving • React Basics

PROJECTS

E-Commerce Platform

- Designed an E-commerce Site using Java Swing where there will be two distinct sides one is seller and the other is customer. The products will be added by the seller and saved in database (MYSQL) then reterived and displayed directly on to the site. Customer can buy the products available on the site and can filter those products according to the title and categories. They can add the items to the cart. The order's records and products history is maintained. [Github-Link](#)

Sudoku Game Solver

- Created a console application using C++ through which any user can play the sudoku Game. It has three different levels easy medium and hard. This includes backtracking mechanism. Whenever the user quits the game or takes help then the solution is being displayed and solved using backtracking. [Github-Link](#)

SMALL PROJECTS

Blog

- Designed a Markdown Blog using Node JS, Express and MongoDB.

URL Shortener

- Designed a URL Shortener using Bootstrap, Node JS, Express and MongoDB which has increased the efficiency of the web site.

ABOUT ME

- I'm very passionate about Networking and Web Development . Great determination and dedication towards the work I do.
- Daily problem solver in LeetCode with solid knowledge of Data structures and Algorithms. [LeetCode-Link](#)
